

# PRC Series

Cartridge Systems for  
Aboveground Pools by Sta-Rite®

## A package deal

Matching up the right pump and filter combination is the key to less maintenance and economical performance. The PRC aboveground pool system is a customized package showcasing advanced technology from Sta-Rite®. The system's high-capacity filter holds more dirt, which extends the time between cleanings – and it's capable of removing suntan lotions and body oils. Each component is engineered to make maintenance easier and less frequent, which means you'll spend a lot more time enjoying your pool. The PRC system offers exceptional value and proven durability at an affordable price.

- Cartridge filtration provides superior water clarity and adds a sparkling shimmer by day or night.
- Cleaning the filter is as easy as opening the tank, spray-rinsing the cartridge element and closing it up. Cleaning the pump is just as effortless – simply empty the strainer basket and re-apply the lid.
- PRC filter is power-molded from high-density thermoplastic to ensure long life.
- ABG pump is made of Dura-Glas™, an exclusive composite resin that stands tough against weather extremes and ultraviolet rays.
- Performance-matched components run quieter, so your poolscape is always peaceful.

For convenience and economical performance, the PRC system puts it altogether:

# PRC Series Cartridge Pool Systems

**Just one look.** Top-mounted pressure gauge is conveniently positioned for easy reading.

**Safe, easy access.** Posi-Ring® closure provides safe, easy access to the filter module. Fast in, fast out!

**Year-after-year toughness.** Rugged, high-density composite resin will never corrode and weathers the elements.

**Barely a sound.** Precision-engineered pump components significantly reduce sound emissions and won't intrude on those peaceful, quiet times.

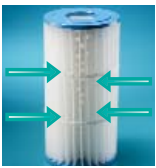

**Way less maintenance.** Large-capacity trap collects more dirt and extends the time between cleanings.

**Fits right in.** Compact design and matte black finish blends well in any poolscape.

## An awesome pair

The system's perfectly matched ABG pump and PRC filter perform with the greatest of ease, resulting in increased energy efficiency and ultra-quiet operation. Pump and filter maintenance is minimized, so you get maximum enjoyment and relaxation from your poolscape.

### Less maintenance...YES!

The filter tank is designed to direct water through more of the filter's surface area, which boosts the cartridge's dirt-handling capacity without clogging. This extends the time between cleanings.

### Spin and rinse

A quick spin of the Posi-Ring® closure and you have complete access to the filter module. Simply spray-rinse the cartridge and in minutes you're back to relaxation and fun.

### Quick and easy

When cleaning is required, an easy twist of the wrist gives you access to the ultra-sized strainer basket. Simply empty the basket, re-attach the "clear-view" trap lid and twist it to the right.

## Filter Performance

Model	ABG Pump (HP)	Filter Area (Sq. Ft.)	For Pools up to (Gal.) 8 Hr. Turnover	Optimal <sup>1</sup> Performance at this GPM
PRC50ABGD	¾	50	22,000	47
PRC50ABGE	1	50	30,000	64
PRC75ABGE	1	75	30,000	64

<sup>1</sup> Operating at this GPM will provide the longest filter cycles combined with the best and greatest dirt-loading capacity.

**Operating Limits** – Maximum continual operating pressure is 30 PSI. For pool/spa (bather) applications, the maximum operating water temperature within the filter is 104°F (40°C).

One-year limited warranty. See warranty for details.
